*Presented by the

GOVERNMENT OF SOUTH AUSTRALIA

*Commentary to the Statement of the Amounts Credited to and Issued from the Consolidated Account for the Quarters Ended 30 September 2018 and 30 September 2017***Receipts***Taxation*

Payroll tax receipts in the September quarter 2018 were higher compared to the corresponding prior year period reflecting growth in taxable payrolls.

Stamp duty receipts in the September quarter 2018 were higher compared to the corresponding prior year period, mainly due to higher receipts from stamp duty on insurance. Underlying conveyance duty receipts were impacted by the abolition of stamp duty on the transfer of non-residential, non-primary production property from 1 July 2018.

Gambling tax receipts in the September quarter 2018 were higher compared to the corresponding prior year period, largely due to higher receipts from the South Australian Lotteries Commission and the Betting Operations Tax. The Betting Operations Tax became effective from 1 July 2017. The September quarter 2017 represents 2 months of collections as it is paid monthly in arrears whereas the September quarter 2018 represents 3 months of collections.

Land tax receipts in the September quarter 2018 were lower compared to the corresponding prior year period, mainly due to the timing of payments.

Contributions from State Undertakings

Contributions from State Undertakings were lower compared to the corresponding prior year period, largely due to the Return to Work income tax equivalent of \$73m which was paid in the 1st quarter of the 2017-18 financial year. It was due to be paid in the 2016-17 financial year.

Royalties

No royalty receipts were recognised in the September quarter 2018 due to timing of payments to the Consolidated Account. However, underlying collections for the September quarter 2018 were higher compared to the corresponding prior year period, mainly due to increases in both petroleum prices and production.

Fees and charges

Fees and charges in the September quarter were higher compared to the corresponding prior year period, mainly due to a small increase in the collections of guarantee fees and regulatory fees.

Commonwealth – General Purpose Payments

Growth in general purpose grants in 2018-19 compared to 2017-18 is not indicative of underlying Goods and Services Tax (GST) revenue growth. This is because monthly grants are paid according to a payment schedule prepared by the Commonwealth Government rather than actual emerging monthly GST collections.

In its 2018 Mid-Year Economic and Fiscal Outlook, the Commonwealth Government estimated that the GST pool available for distribution to jurisdictions would grow by 5.6 per cent in 2018-19.

Commonwealth – Specific Purpose Payments

Specific purpose payments (SPP) received in the September quarter 2018 were lower compared to the corresponding prior year period reflecting the cessation of the Disability Services SPP and commencement of full scheme National Disability Insurance Scheme arrangements.

Commonwealth – National Partnership Payments

National Partnership payments received in the September quarter 2018 were broadly in line with the corresponding prior year period.

Other receipts

Other receipts in the September quarter were marginally lower compared to the corresponding prior year period, mainly due to the timing of repayments for loan advances.

Payments

Payments were made pursuant to the *Appropriation Act 2018*, and also in accordance with other Acts for which specific appropriation has been authorised. The timing of payments is based on agreed drawdown schedules, and may change from period to period depending on specific agency requirements.

Note

The following points should be considered when reviewing the quarterly statement of Consolidated Account transactions.

- Unlike, the State Budget, which comprises transactions on an accrual basis, the information reflected in the quarterly statements is limited to cash transactions.
- The Consolidated Account does not capture all the transactions undertaken by the general government sector (in particular, it does not record receipts to and payments from special deposit accounts).
- The timing of receipts and payments could be volatile within a particular year. As a result, apparently large movements between years may only be due to changes in the timing of receipts and payments and therefore may not have consequences for the underlying budget position.

GOVERNMENT OF SOUTH AUSTRALIA

COMMENTARY TO THE STATEMENT OF THE AMOUNTS CREDITED TO AND ISSUED FROM THE CONSOLIDATED ACCOUNT FOR THE QUARTERS ENDED 30 JUNE 2018 AND 30 JUNE 2017

Receipts

Taxation

Payroll tax receipts in both 2017-18 and the June quarter 2018 were higher compared to the corresponding prior year periods reflecting growth in taxable payrolls.

Stamp duty receipts in 2017-18 were lower than in 2016-17, primarily due to lower revenue from conveyance duty. This mainly reflects the impact of the phased abolition of non-residential, non-primary production properties. This impact is also reflected in the variance between the June quarter 2018 and the June quarter 2017.

Gambling tax receipts in both 2017-18 and the June quarter 2018 were higher compared to the corresponding prior year periods, mainly due to the commencement of the Betting Operations Tax from 1 July 2017.

Land tax receipts for 2017-18 and the June quarter 2018 were lower compared to the corresponding prior year periods reflecting the impact of billing delays in 2015-16, resulting in the receipt of some 2015-16 land tax liabilities in 2016-17.

Royalties

Royalty receipts in 2017-18 were higher than in 2016-17 primarily reflecting increased copper production as well as higher copper and oil prices.

Quarterly royalty receipts are impacted by timing issues. Underlying royalty receipts in the June quarter 2018 were higher compared to the corresponding prior year period, mainly due to higher petroleum and copper prices, as well as higher petroleum production.

Fees and charges

Fees and charges for 2017-18 were higher than in 2016-17 due to the timing of payments received into the Consolidated Account during 2017-18.

Commonwealth – General Purpose Payments

Growth in general purpose grants in 2017-18 compared to 2016-17 is not fully indicative of underlying Goods and Services Tax (GST) revenue growth. This is because monthly grants are paid according to a payment schedule prepared by the Commonwealth government rather than actual emerging monthly GST collections.

GST revenue grants in 2017-18 and the June quarter 2018 were higher compared to the corresponding prior year periods reflecting growth in the GST entitlement pool and South Australia's grant share.

Commonwealth – Specific Purpose Payments

Specific Purpose Payments (SPPs) for 2017-18 and the June quarter 2018 were broadly in line with the same periods last year.

Commonwealth – National Partnership Payments

National Partnership (NP) payments were higher in 2017-18 and the June quarter 2018 compared to the corresponding prior year periods, mainly due to the timing of receipts for the Pay Equity NP and the first receipt of Commonwealth funding for the Northern Adelaide Irrigation Scheme NP.

Other receipts

Other receipts for 2017-18 were higher than in 2016-17 mainly due to the commercialisation of the Lands Title Office.

Payments

Payments were made pursuant to the *Appropriation Act 2017*, and also in accordance with other Acts for which specific appropriation has been authorised. The timing of payments is based on agreed drawdown schedules, and may change from period to period depending on specific agency requirements.

Note

The following points should be considered when reviewing the quarterly statement of Consolidated Account transactions.

- Unlike the State Budget, which comprises transactions on an accrual basis, the information reflected in the quarterly statements is limited to cash transactions.
- The Consolidated Account does not capture all the transactions undertaken by the general government sector (in particular, it does not record receipts to and payments from special deposit accounts).
- The timing of receipts and payments could be volatile within a particular year. As a result, apparently large movements between years may only be due to changes in the timing of receipts and payments and therefore may not have consequences for the underlying budget position.
